MEMORANDUM FOR: Chief, Confidential Funds Division

25X1A9A SUBJECT : [REDACTED] Request for Relief from Charge  
for Excess HIF.

1. You will find attached a memorandum from Mr. [REDACTED] addressed to the Deputy Director for Support, in which Mr. [REDACTED] appeals a disallowance for the shipment of excess household effects. Our review of the file indicates there is some confusion concerning which regulations apply to this particular travel, and precisely how much Mr. [REDACTED] may owe to the Agency. If possible, we should like to resolve this difference before presenting the case to the DD/S.

"If the combined weights of effects shipped and stored exceed the weight limit specified in paragraph 11a(2)(a)(1) above, the excess shall be attributable to storage except where the amount shipped exceeds the maximum weight allowance of the employee".

25X1A9A

It therefore appears that Mr. [REDACTED] computation is the proper one, and that his maximum obligation to the Agency is \$374.10 rather than \$972.78. In fact, he may owe less than the \$374.10, since a technical interpretation of the regulation could allow him to apply all of the excess to storage and none of it to the goods shipped.

3. Since the treatment of the excess weight as storage is authorized, the adjustment of the amount can be effected without referral to higher authority. We should appreciate it if you could review the file, and discuss it with Mr. [ ] if necessary, to resolve the exact amount of the indebtedness. Once this is accomplished, please return the file to us for presentation to the ID/S unless Mr. [ ] agrees to pay the adjusted amount.
